

Connor Meador

AI AUTOMATION ENGINEER · FULL-STACK DEVELOPER

Penfield, NY · connormeador@gmail.com · (949) 939-2974 · [linkedin.com/in/connormeador](https://www.linkedin.com/in/connormeador) · github.com/ConnorMeador · connormeador.com · ROC Web Tech (585) 454-9716

Open to remote full-time roles (U.S.) · Eastern Time · Available now

SUMMARY

AI automation engineer with full-stack depth — multi-model AI routing, RAG pipelines, workflow automation, and production chat assistants, built into Next.js 16 / React 19 / TypeScript apps I ship end-to-end on Supabase/Postgres. Remote-native: async client communication, documentation-first process, GitHub PR + CI workflow on every deploy.

Founded ROC Web Tech and operate 17 live production sites solo, including a 10-site local-directory network with an AI chat assistant on every property. Building solo taught me to ship — self-taught the modern stack and took the first site live in weeks — and now I'm looking for the things solo work can't teach: code review, mentorship, and a team's conventions. 4.0-GPA computer-science foundation (A.S., Orange Coast College).

EXPERIENCE

Founder — AI Automation & Full-Stack Engineering

ROC Web Tech (independent practice) · rocwebtech.com · Rochester, NY (remote)

Apr 2026 – Present

- Built the AI platform behind the agency: a multi-model router dispatching tasks across Claude, GPT, Gemini, Groq, DeepSeek, and local Ollama models with automatic failover, GPU-contention locking, and hard budget caps; a RAG pipeline with local embeddings and LLM reranking; and OpenAI-powered chat assistants live on 10 production sites.
- Automated operations end to end — a 31-agent orchestrated build system with evidence-gated review, an autonomous SEO engine (IndexNow submissions, sitemap + Search Console coverage, scheduled audits, geo-grid rank tracking), an AI social-content engine that drafts and schedules 100+ posts/month, a Stripe-paid audit product with automated fulfillment, and a library of 11 reusable n8n automation templates.
- Run a 17-site live production fleet solo — four client platforms, a 10-site local-business directory network, and three agency/portfolio properties — owning everything from requirements and client check-ins to build, deploy, and post-launch iteration, with sites held to Core Web Vitals, WCAG, and 95+ Lighthouse at launch audits.
- Ship production Next.js 16 / React 19 / TypeScript apps with real backends — Auth.js authentication with role-based access, Supabase/Postgres with row-level security, Stripe checkout with signature-verified webhooks, and transactional email — covered by Vitest and Playwright suites.

PROJECTS

Multi-Model AI Orchestration Platform

github.com/ConnorMeador (private repo — walkthrough on request) · TypeScript · Node.js · Claude API · OpenAI API · Ollama · MCP · 2026

- Self-hosted AI platform powering ROC Web Tech: task-class routing across cloud and local models with automatic failover and per-run budget enforcement; a retrieval-augmented-generation knowledge base (local embeddings + LLM reranker) exposed over MCP; and a 31-agent evidence-gated fleet that plans, builds, and reviews site work.

My Place Cigar Lounge

my-place-lounge.com · Next.js 16 · TypeScript · Supabase · Auth.js · Stripe · 2026

- Members-only platform: Auth.js-authenticated member portal and admin panel with member/owner role-based access (Supabase RLS + middleware), event RSVPs, and invite flows — covered by Vitest, Playwright, and RLS-policy integration tests.

10-Site Local Directory Network

rocpoolservice.com · Next.js 16 · TypeScript · OpenAI API · Vercel AI SDK · MongoDB · 2026

- Ten live Rochester service directories from one gold-reference template — 250+ verified business listings in LocalBusiness schema, weighted rankings, per-niche AI chat assistants, and MongoDB lead capture; top site scored 9/10 on an adversarial chatbot eval.

SKILLS

Languages: TypeScript · JavaScript · Python · Java · C++ · C# · SQL · HTML · CSS

Frontend: Next.js 16 · React 19 · Tailwind CSS 4 · App Router · Zustand · Responsive Design · WCAG Accessibility

Backend & Data: Node.js · REST APIs · PostgreSQL · Supabase · Auth.js · Row-Level Security · Stripe · MongoDB · Sanity CMS

AI & Automation: Workflow Automation · n8n · API Integration · Claude API · OpenAI API · Vercel AI SDK · RAG (embeddings + reranking) · MCP · LiteLLM · Ollama · Prompt Engineering · Claude Code

DevOps & Tooling: Git & GitHub · Vercel CI/CD · GitHub Actions · Docker · Playwright · Vitest · SEO / JSON-LD

EDUCATION

Associate of Science, Computer Science

Orange Coast College · 2017 – 2024 · 4.0 GPA · President's List & Honor's List

Computing & Information Technologies

Rochester Institute of Technology · 2024 – 2026 · Left Spring 2026 to ship production work full-time.
